Shumway Neighborhood News

March 2nd – Zoom Meeting

Bulky Item Pickup Service

Like last year, Vancouver residents with an active Waste Connections garbage service are eligible for one curbside disposal of up to five bulky items for free. Residents can sign up to schedule this one special pickup for any available day in 2022.

Growing the Vine

C-TRAN has had several discussions and open houses for the 3rd BRT, located on the north/south route, coming down Main Street.

LPA will be voted on at the March 28th C-TRAN Board of Directors’ meeting. If you want additional info, scan the QR code:

Don’t sleep on the NAP!

Shumway Neighborhood Action Plan Vision Statement

The Shumway Neighborhood is a diverse and welcoming place to live, work, and play. We encourage civic engagement where new ideas and diversity of opinion are respected and valued. Residents collaborate with public agencies to improve public safety by reducing crime and other destructive acts. As one of Vancouver’s oldest neighborhoods, we honor our rich historic heritage by promoting the preservation of existing homes while encouraging new and affordable construction that complements the aesthetic integrity of our architectural past. We promote safe, walkable, and bikeable streets that connect us to our schools, parks, businesses, and scenic waterfront. Shumway strives to be a green, sustainable neighborhood that preserves our natural environment, open spaces, and urban forest for our current enjoyment and the enjoyment of future generations.

Aging Readiness Plan Update

The Clark County Aging Readiness Plan assesses the county’s readiness to serve as a home for a growing number of older residents. The plan includes strategies to improve the community’s capacity to support its growing older population and ultimately benefit people of all ages. The plan covers the topics of housing, transportation/mobility, health care, support services, and civic activities.

The Commission on Aging is updating the Aging Readiness Plan and wants public feedback to help assess implementation to date, refine existing strategies, brainstorm new ideas for the updated plan, and guide the creation of a new chapter focused on emergency preparedness.

The commission will host interactive public workshops in 2023 at the following times and locations:

- **Workshop #1: Strategy Feedback & Brainstorm.**
Please attend the following:
 - o Mar. 15, 2023, 3:30-5:00pm, in-person event at Battle Ground City Hall

For more about the commission, visit www.clark.wa.gov/aging

How Kill the Tree of Hell

The “**Tree of Heaven**” is an invasive, toxic plant that grows very rapidly and can quickly take over property. It is difficult to get rid of and secretes a chemical into the soil that is **toxic** to surrounding plants. It can grow 15 feet in a year and become **unmanageable**, if ignored. This tree is also **poisonous** to pets, and they are all over the Shumway Neighborhood!

The Tree of Heaven can be identified by its uniform mirrored leaflets and pungent odor of burnt peanut butter when leaves are crushed. It has smooth bark and a weak structure that is easy to break. Its lookalike, the Black Walnut, has jagged offset leaves. For further help with identifying the Tree of Heaven, download the PictureThis app on [Android](#) or [Apple](#). If you want to assist with “tagging” trees, download the EDDMapS app from the [Android](#) or [Apple](#) app stores. <https://www.eddmaps.org/>

It may take 2-3 years to eliminate the plant. To get rid of the tree, please follow the recommendations from Table 3 on the USDA.gov site: https://www.fs.usda.gov/Internet/FSE_DOCUMENTS/stelprdb5410131.pdf :

Table 3. Herbicide recommendations for foliar spraying

Common Chemical Name (active ingredient)	Product Example ¹	Product Example Rate per Acre (broadcast)	Backpack Sprayer Treatment Using Product Example ²	Time of Application	Remarks
Glyphosate	RoundUp Pro (41%) and others	2–5 quarts	2% (use with 0.5 percent surfactant and a blue indicator dye)	Summer/early fall; apply when tree is actively growing and fully leafed, but before fall color begins.	Nonselective herbicide; overspray can injure surrounding plants and open more area for weeds.
Imazapyr	Arsenal, Habitat, Chopper, Stalker, and others	Arsenal: 1–1.5 pints Chopper: 2–3 pints	Arsenal: 1–5% Chopper: 5%	Same as above.	Nonselective herbicide; overspray can injure surrounding plants and open additional area for weeds. Nontarget plants may also be killed or injured by root transfer of imazapyr between intertwined root systems.
Aminocyclopyrachlor + imazapyr + metsulfuron methyl	Viewpoint	13–20 ounces	Consult label for spot applications.	Apply as high volume or broadcast foliar spray.	Nonselective herbicide used on noncrop sites; may cause temporary injury to some grass species.
Triclopyr	Garlon 4, Remedy, and others	3–6 quarts	1–2%	Summer/early fall; apply when tree is actively growing and fully leafed, but before fall color begins.	Selective, systemic herbicide; will not impact grasses but can harm other trees, shrubs, and broadleaf plants.
Dicamba	Vanquish, Banvel, and others	2 quarts	5%	Same as above.	Same as above.

¹ Trade names for products are provided for example purposes only, and other products with the same active ingredient(s) may be available. Individual product labels should be examined for specific information and appropriate use with tree-of-heaven.

² Herbicide/water ratio - As an example, a gallon of spray water with a 3 percent mixture is made by adding a sufficient volume of water to 4 ounces of liquid herbicide until a volume of 1 gallon is reached (4 oz ÷ 128 oz/gal = 0.03 or 3 percent). For dry formulations, particulates should be added to sufficient water as specified by the label until the required concentration or volume of spray water is reached.

Identify plants here with PictureThis app:

Tag invasive plants here with EDDMapS app:

The Watershed Alliance awards grants to neighborhoods, covering up to 50% of the cost of tree removal. If you would like the Tree of Heaven on your property to be included in the grant application, please contact Alix at 561 601 4587, Grants require 3 or more neighbors to sign up.

Coexisting with Coyotes:

WHO TO CALL FOR HELP

If these tactics fail and you need help with a serious coyote problem, please visit our Web page at www.clark.wa.gov/community-development/wildlife

For more information, read the state's "Living with Wildlife" series at www.wdfw.wa.gov/living

Clark County Comprehensive Plan Update

Clark County is conducting a periodic review of its Comprehensive Plan (Plan) as required by the Washington State Growth Management Act (GMA). The county is required to complete its update by June 30, 2025. The Plan, originally adopted in 1994 and last updated in 2016, is a long-range policy guide for how the county plans to manage growth and development over a twenty-year period. The GMA requires jurisdictions to periodically update their comprehensive plan and development regulations to bring them up to date with:

- Changes to state law,
- Land use changes,
- Population growth projections, and
- Housing projections.

The Comprehensive Plan guides County decisions related to land use; housing; capital facilities and utilities; rural and natural resources; transportation; economic development; parks, open space and recreation; schools; historic preservation; environment; community design; shoreline; and annexation.

The focal point of the County's long-range planning is the County's Comprehensive Plan and its Capital Facilities Plan which help with policy, financing and development regulation decisions over the 20-year period.

Meeting information can be found here: <https://clark.wa.gov/community-planning/2025-update-meeting-and-event-information>
