Commission Public Hearing
Chris Malone, Public Works Finance and Asset
Manager

Presentation overview

- Transportation Improvement Program (TIP) overview
- Review proposed updates for the 2023-2028 Transportation Improvement Program (TIP)
- Update on community outreach efforts
- Review items to be evaluation for inclusion in future TIP updates
- Next steps

Presentation purpose

- Third touch point with the TMC for the 2023-2028 annual TIP update.
- Public Hearing on formal recommendation from TMC to the City Council related to adoption of current year updates to the City's 6-Year Transportation Improvement Program.

Transportation Improvement Program (TIP) Basics

- Each year the City of Vancouver prepares a Six-Year Transportation Improvement Program (TIP). We're currently updating it for 2023-28.
- Per Washington law, the TIP document is updated annually, with final City Council approval required before July 1 of each year.
- The TMC is the primary citizen oversight committee responsible for reviewing and making recommendations on the TIP.
- Each annual update of the TIP includes a funded, partially funded and unfunded list.
- The TIP divides projects into different categories including arterial improvements; active transportation; signal and lighting improvements; and ongoing.

Review 2023-2028 TIP Updates

- Updated project lists as shared with the TMC during February 1st meeting.
- Change “multimodal” category to “active transportation”.
- Change “capacity” category to “arterial improvements”.
- Change “traffic” category to “signal and lighting improvements”.
- Updated the scoring criteria for social equity to be consistent with the City’s equity index map.
- Transit is now included in the scoring criteria for congestion management.

Review 2023-2028 TIP Updates (cont.)

- Pedestrian and bicycle improvements now have a graduated scale in the scoring criteria for active transportation (0-100 lineal feet; 100-500 lineal feet; greater than 500 lineal feet).
- Confirmed that multi-use path is included in project description for 18th Street project.
- Will add text indicating that there is a large backlog of unfunded projects.
- Included a member from the Regional Transportation Council (RTC) to help score projects.

Public Outreach

- Online dashboard now available for reviewing all projects listed in the Transportation Improvement Program (also includes all utility projects included in the City's 6-Year Capital Improvement Program) www.cityofvancouver.us/tip.
- Additional outreach to community-based organizations and partners serving historically excluded and underrepresented communities (list of stakeholders available upon request).
- Outreach through all City channels- including neighborhood associations, newsletters, social media etc.- in addition to TMC and Council processes.

Reviewing Additional Revisions for Future TIP Updates

The following items require additional analysis and will be assessed as part of the ongoing Transportation System Plan (TSP) update and possibly included in the 2024-2029 TIP.

- Factor project costs into the scoring criteria.
- Include level of stress into the scoring criteria.
- Include climate action plan into the scoring criteria.

Next Steps for 2023-2028 TIP update

- City Council workshop June 6th, 2022 to review the draft 2023-2028 TIP.
- City Council public hearing on June 27th, 2022 to consider adoption of the TIP.

Staff Recommendation

Staff recommends the TMC recommend Council approve the 2023-2028 6-Year Transportation Improvement Program as provided for in the staff report and attachments.

Commission Discussion

Commission questions, deliberation, discussion and vote
