2026-2031 Utilities Capital Improvement Program

Hello neighbors,

Water is a vital resource required for our City's growth and livability. The City of Vancouver Public Works Department ensures our water related utilities systems serve our community's needs now and for generations to come.

The City manages our drinking water, wastewater, and surface water utilities in accordance with the City's overall vision and values. Each utility works within an integrated system that protects or enhances our water resources. For example, the drinking water utility helps protect Vancouver's aquifers and provides safe, clean drinking water for the citizens of Vancouver. The sewer, or wastewater, utility collects and treats discharge from residential, commercial, and industrial users so that clean water can be reintroduced to the environment. The surface water, or stormwater, utility helps protect greenways and manage stormwater runoff before discharge to creeks, rivers, or infiltration into the ground. Protecting this system is the focus of our water resilience strategy. When managed well, each utility supports the others through strengthened system resilience, that together helps ensure the overall livability of our city.

Maintaining this integrated water system is critical. With preventative and routine maintenance and reinvestments in our outdated infrastructure, we are better able to meet the demands of a growing community, comply with new regulatory guidelines, protect our natural surroundings, and maintain or reestablish services faster following natural disasters or other emergency events.

We Take Care of What We Have

We know our drinking water, wastewater, and surface water systems are facing challenges. Some of our infrastructure has reached the end of its useful life and needs replacement or rehabilitation. We also face increasingly stringent regulatory requirements, operational challenges, and opportunities to improve community livability, equity, and social justice. Climate change, security, and seismic hazards present additional threats to system safety and service reliability.

Applying a balanced approach and using realistic planning assumptions to fund the current and future needs of our integrated water system will enable us to overcome these challenges. By actively managing our water systems, we protect the assets that serve us all and strive to keep services affordable for everyone.

Through the following 2026-2031 Water, Wastewater, and Surface Water Capital Improvement Plan, the City has identified projects that will support the ongoing maintenance and upgrades to our existing infrastructure over the next six years. Central to the Water Resiliency Framework developed in 2021 which was developed to prioritize investments around these systems, the projects and improvement efforts identified will help reach the following goals:

- Protect and improve water and air quality for better public health and environmental protection.
- Provide capacity to support economic prosperity.
- Protect and improve natural areas and community livability.
- Reduce flooding, seismic, and security risks.
- Replace aging infrastructure.
- Identify more sustainable uses of wastewater and water resources.

To help pay for these significant investments, staff will continue to work with the City Council in the future biennium to implement agreed upon funding strategies including incremental annual rate increases, utilizing debt when it makes sense, ensuring system development charges applied to new development are appropriate, and reducing the "outside city rate multiplier" from 1.5 to 1.25 over a 15-year period for those customers located within the City's Water Service Area but outside the official City Limits.

Our future depends upon our ability to invest in our utilities in a way that enhances and preserves the livability, safety, economic, and environmental well-being of our city. As we navigate the challenges ahead, we will continue using innovative solutions and look for opportunities that will support our thriving community now and for future generations to come.

We encourage our community to review the highlights of the 2026-2031 Capital Improvement Plan shown in the following tables. Please don't hesitate to contact our staff if you have any questions or concerns regarding your water-related utilities services.

Steven R. Wall. P.E. Public Works Director

2026-2031

Key drinking water projects and efforts:

- Implementation of new federal requirements pertaining to Perand Polyfluoroalkyl Substances (PFAS) including installation of treatment systems and new wells drilled into a deeper, uncontaminated aguifer.
- Capital programs focused on rehabilitation and/or replacement of worn and obsolete water treatment facilities. This includes several chlorine disinfection system upgrades to state-of-the-art sodium hypochlorite disinfection technology.
- Ongoing upgrade and replacement of water mains throughout the distribution system that have been identified as high risk and/or high maintenance.
- Production well replacement projects at multiple water stations (well fields) to improve reliability.
- Ongoing installation of transmission mains to move water from high production sources to areas of development.
- Electrical equipment replacement at water production stations.

Key wastewater projects and efforts:

- Ongoing, multi-phased project to replace the SCADA technology network for enhanced monitoring and operation of collection system pump stations and wastewater treatment plants.
- Replacement of aging electrical equipment for site power supply and emergency power switchgear at the Westside Treatment Plant.
- Programmatic approach to reimagine management of solids and move towards renewable resources at the Westside Treatment Plant.
- Prepare for multiple projects that will improve, expand, and manage solids conveyance and treatment needs at Marine Park and Westside treatment plants.
- Upgrade and replacement of wastewater effluent ultraviolet disinfection system at Marine Park treatment plant.

- Upgrade and replacement of wastewater influent screens at Marine Park treatment plant.
- Upgrade of secondary treatment processes at Marine Park treatment plant.
- Continued projects to completely rehabilitate or replace sections of the collection system's largediameter interceptor piping.
- Ongoing individual projects within the Sewer Connection Incentive Program (SCIP) removing septic systems and bringing reliable sewer service to more homes.
- Ongoing rehabilitation or replacement of sewer mains throughout the collection system that have been identified as high risk and/or high maintenance.

Key surface water projects and efforts:

- Ongoing efforts using limited available capital funds to leverage grants to address stormwater quality and quantity issues throughout Vancouver.
- Capital projects involving regulatory compliance and replacement of substandard systems.
- Ongoing improvements to the Burnt Bridge Creek watershed.
- requirementation of new requirements and programs required by implementation of the City's 2024 2029 Stormwater National Pollutant Discharge Elimination System (NPDES) permit.
- Evaluation of existing systems to determine and prioritize rehabilitation or replacement of needs.

Utility Policies

Comprehensive Plan Polices for Water, Sewer, and Surface Water (Adopted Nov. 7, 2011)

- PFS-1 SERVICE AVAILABILITY (ALL UTILITIES): Consider water, sewer, police, transportation, fire, schools, storm water management and parks as necessary public facilities and services. Ensure that facilities are sufficient to support planned development.
- PFS-2 SERVICE STANDARDS (ALL UTILITIES): Establish service standards or planning assumptions for estimating needed public facilities, based on service capabilities, local land use designations and nationally recognized standards.
- PFS-21 WASTEWATER RECLAMATION: Eliminate health hazards from domestic and industrial wastewater and return clean water to the environment.
- PFS-22 SEWER SERVICE: Provide sewers and sewer service to every Vancouver home, business, and industry at an affordable and equitable cost. Discourage development that includes on-site sewage treatment systems. Encourage existing development using septic systems to connect to public sewer as soon as available. Ensure that the infrastructure to support sewer service is in place prior to or at the time of development.
- PFS-23 WATER SERVICE: Provide safe, clean, quality drinking water to every Vancouver home, business, and industry. Discourage development that includes private drinking water wells. Provide water pressures and volumes necessary to support fire suppression hydrants and sprinkler systems. Ensure that the infrastructure to support water service is in place prior to or at the time of development.
- PFS-24 SEWER AND WATER SERVICE EXTENSION: Public sewer and water service should not be extended outside the Vancouver urban growth area except to (a) Remedy a threat to public health or safety. (b) Remedy a threat to water resources, (c) Provide service to uses within the urban reserve district otherwise required to be served (d) Support development envisioned in a jurisdiction's comprehensive plan (e) Water service may be extended if it is consistent with the Clark County Coordinated Water System Plan and does not increase density beyond the adopted Comprehensive Plan. The existence or extension of sewer or water service should not be used to justify changes to the Comprehensive Plan.
- PFS-25 SURFACE WATER MANAGEMENT: Manage storm water to safely pass floodwaters, maintain and improve water quality of receiving streams, lakes, and wetlands, protect and enhance fish and wildlife habitat, promote recreational opportunities, and enhance community aesthetics.

Comprehensive Plan Policy for Asset Management (Adopted Dec. 16, 2013)

PFS-35 City public facility assets shall be systematically managed to balance full life cycle costs, performance, risk, and service levels, using best management practices and data.

Financial Policies for Capital Planning and Asset Management (Adopted Nov. 21, 2022)

- In pursuit of an asset management strategy that prioritizes safety, equity and climate 1. action, the City will:
 - Consider the climate impacts of asset investments and pursue asset management strategies that reduce its contribution to climate change over time.
 - Consider equity impacts of capital projects and asset management strategies and prioritize investments that improve equity within the City.
 - Consider the potential improvements to community safety associated with capital investments and prioritize investments that improve community safety, particularly in the transportation system.
- 2. Asset management best practice involves managing the performance, risk and expenditures on infrastructure assets in an optimal and sustainable manner throughout their lifecycle covering planning, design, construction, operation, maintenance, and disposal. The City shall integrate the principles and best principles and best practices of asset management such as those embodied International Infrastructure Management Manual in the management of its assets. Asset inventory will be maintained with maintenance, repair and referred maintenance costs identified and updated on an annual basis. Maintenance of city assets shall be addressed on a current need, rather than deferred into the future.
- 3. In 2015, Council adopted a new Street Funding Program in response to formal recommendations from a citizen-led effort. Revenues from this program were established to supplement without supplanting street funding resources identified in the 2015-2016 Adopted Biennial Budget. Annual reporting to Council and the residents of outcomes achieved through the Street Funding Initiatives Program has been initiated in 2017 and shall continue into the future. The City will remain funding the Pavement Management Program at not less than that in the 2015-2016 Biennial Adopted Budget level increased by an appropriate inflationary factor, if necessary. To ensure accountability and transparency, the increase in program level funded by the new Street Funding Program revenue sources will be fully costed, budgeted for and spent from special funds created to track direct operating, capital and administrative expenses. Annual reporting of the outcomes will be published for the residents and the City Council prior to the end of the first quarter of each year for the prior year beginning for fiscal year 2016.
- The City will redirect to the new Street Funding Program expiring debt service budget 4. from pre-2015 debt issues for transportation projects, beginning with debt expiring in 2016.

- 5. A six-year City-Wide Capital Improvement Program shall be developed annually and shall provide a prioritized list of reasonably funded projects and those in process of securing funding. Capital Improvement Plans for utility assets shall be updated no less frequently than every two years. The comprehensive plan will identify longer-term capital needs by program area.
- 6. Funding for capital projects, including major facilities maintenance projects, will be allocated in a manner that balances community needs with City priorities, the potential for attracting matching funds, and the ability to reduce or limit expenses in future years.
- 7. The City's objective is to incorporate a "pay-as-you-go" approach (using available cash and current resources) in the Capital Improvement program. Proceeds from the sale of city capital assets no longer utilized in operations will be deposited consistent with the initial ownership of the asset and invested in the highest priority city capital projects. Debt funding shall be considered for large capital projects with long useful life to better reflect inter-generational equity.
- 8. The capital budget will be adopted at the same time the City operating budget is adopted. The capital budget will only include fully funded projects. The capital budget will only contain projects identified in the Capital Improvement Program.
- 9. A capital repair appropriation will be maintained for unanticipated major repairs of general operating facilities and for emergency replacement of general fund equipment. Additions to the capital repair contingency reserve will be made based on Council directions.
- 10. **Impacts on net annual operating and maintenance costs** will be identified as part of the funding considerations for new capital projects such as buildings, parks and street enhancements. This includes identifying potential reductions in maintenance costs if improvements are funded. The necessary funds to operate the capital facility will be identified at the time the capital budget is adopted.
- 11. In order to provide long-term sustainable utility services, the city will structure utility rates so that system reinvestment including major repair, rehabilitation and replacement of utility assets can be fully funded on an ongoing basis in accordance with the city's 'pay as you go' policy. This will be achieved through a plan of smaller incremental rate increases to maintain affordability. As identified by the utility capital improvement plan, rates will also include an investment component for capacity improvements and system expansion.
- 12. A system development reserve will be maintained to fund growth related capital costs. All systems development charge revenue will be contributed to the fund.

Utility Funding Narrative

Each of the utilities have five components to their funding structure: Revenue, Expenses, Reserves, Debt, and Assets. In broad terms, Revenue is the money brought into the utility, Expenses are the moneys going out of the utility, Reserves are the moneys set aside for emergencies or capital work, Debt is the money owed on loans, and Assets are the value of the infrastructure/facilities and money held by the utility. Below is a general description of each component for the respective utilities.

Water

- Revenues consist of: Ratepayer revenue, System Development Charges (SDC), Loans, Grants, and miscellaneous revenue.
- Expenses consist of: Operations and maintenance activities, Taxes and fees, Loans made to other utilities, Debt service, and Capital improvements.
- Reserves consist of: Debt service reserve, Capital emergency reserve, Water construction reserve.
- Debt consists of: Revenue bonds for capital improvements.
- Assets consist of: Pipes and appurtenances, Water stations, Wells, Water rights, Real property/Easements, Distribution pumps, Operations and maintenance equipment, and cash.

Wastewater

- Revenues consist of: Ratepayer revenue, System Development Charges (SDC), Loans, Grants, and miscellaneous revenue.
- Expenses consist of: Operations and maintenance activities, Taxes and fees, Debt service, and Capital improvements.
- Reserves consist of: Debt service reserve, Capital emergency reserve, Wastewater construction reserve, and Sewer Connection Incentive Program (SCIP) reserve.
- Debt consists of: Revenue bonds for capital improvements, long-term Interfund loan from water.
- Assets consist of: Pipes and appurtenances, Pump stations, Wastewater treatment facilities, Real property/Easements, Operations and maintenance equipment, and cash.

Surface Water

- Revenues consist of: Ratepayer revenue, Loans, Grants, and miscellaneous revenue.
- Expenses consist of: Operations and maintenance activities. Taxes and fees, and Capital improvements.
- Reserves consist of: Surface water construction reserve.
- Debt consists of: State Revolving Loan (SRL) for capital improvements.
- Assets consist of: Treatment facilities, Conveyance facilities, Flow control facilities, Real property/Easements, Operations and maintenance equipment, and cash.

Capital Project Justification

Each utility works on capital projects that can be lumped into five broad categories: Regulatory compliance, improved safety, new systems, replace/preserve/rehabilitate systems, or lower operating costs. Regulatory compliance projects include capital work done to comply with new State or Federal requirements. Improved safety projects are capital projects undertaken to improve the public safety and welfare. New systems capital projects are undertaken to increase capacity or facilitate growth. Replace/preserve/rehabilitate system capital projects are undertaken to replace old infrastructure or prolong existing infrastructure's effective life. Lower operating costs projects include capital work done to increase efficiencies or to otherwise reduce operating costs. Many projects will overlap categories, but these five categories provide the justification for why most public works capital projects are undertaken. Below are examples of the types of projects that can be found in each category for the respective utilities.

Water

- 1) Regulatory compliance: State (DOH) and Federal (EPA) requirements.
- 2) Improved safety: Fire flow improvements, seismic upgrades, and chemical system upgrades.
- 3) New systems: Wells, pumps, treatment systems, controls, storage, and mains to serve new growth or add redundancy.
- 4) Replace/preserve/rehabilitate systems: Wells, pumps, treatment systems, controls, storage, substandard and leaking mains.
- 5) Lower operating costs: Water station upgrades and pump replacement.

Wastewater

- 1) Regulatory compliance: NPDES permit compliance for discharge to Columbia River and air permits for emissions from treatment plant processes.
- 2) Improved safety: Groundwater protection improvements and Sewer Connection Incentive Program (SCIP).
- 3) New systems: New trunk/interceptor/service mains and new pump stations.
- 4) Replace/preserve/rehabilitate systems: Sewer mains and trunk pipes, Controls, Treatment systems, Trenchless Repair, and Pump station replacements.
- 5) Lower operating costs: Treatment plant upgrades and pump replacement.

Surface Water

- 1) Regulatory compliance: NPDES compliance projects and Underground Injection Control (UIC) retrofit.
- 2) Improved safety: Flooding mitigation and groundwater protection improvements.
- 3) New systems: New treatment, conveyance, or flow control improvements.
- 4) Replace/preserve/rehabilitate systems: Treatment facility retrofits, main lining, and infiltration system rehabilitation projects.
- 5) Lower operating costs: Swale retrofits and flow control retrofits.

Capital Project Prioritization

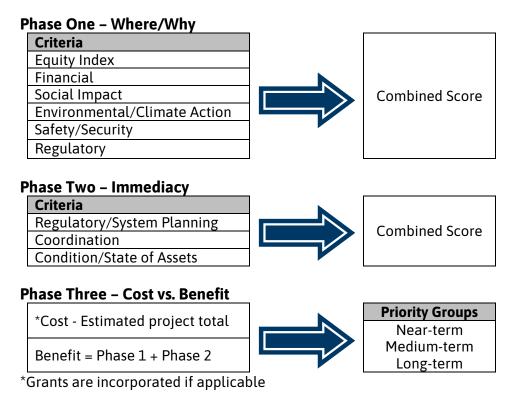

The City is implementing a new CIP prioritization process that scores the 6-year CIP projects. This new scoring tool is based on the prioritization process from the Transportation Improvement Program. The scoring criterion are created to reflect the City's strategic goals, policies, and management directives. Each project is scored on all the criterion which helps ensure fair comparisons. The result is a transparent and defensible decision-making tool to allocate limited resources to a long list of worthy projects. The scores for those projects can be found on the 6-yr project lists.

The 6-year localized CIP projects are scored. Citywide and subarea projects are not scored because they are annual reserves that gets allocated to specific projects or benefits the City as a whole.

Prioritization Tool

The prioritization tool includes three phases of scoring. Phase 1 is where and why, Phase 2 is immediacy, and Phase 3 is a correlation between the cost and benefit (Phase 1 plus Phase 2). The following are criteria for each phase, combined scores and priority groups utilized in the CIP prioritization tool.

Overview:

²⁰²⁶⁻²⁰³¹ Capital Improvement Program

Prioritize Projects

The final step of the CIP prioritization process consists of organizing the projects into priority groups: near-, medium-, and long-term. The near-term projects should be funded first and completed within the 6-year horizon of the Capital Improvement Program as funding allows. The medium- and long-term projects shall be completed in the 6- to 20-year horizon as funding allows.

The tables below are how the correlation between cost and benefit is utilized in determining the priority groups. The cost ranges are based on project cost. The benefit ranges are based on the scores (Phase 1 and 2) of the projects.

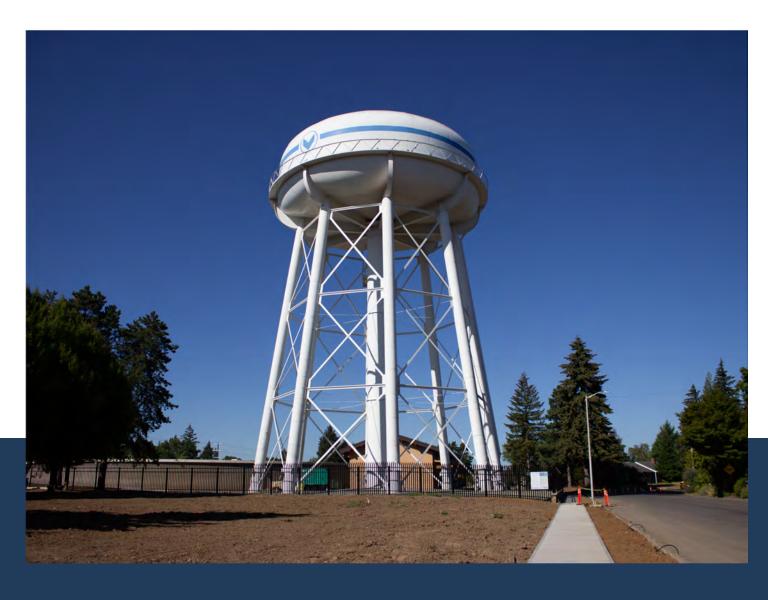

Water, Wastewater Collection and Surface Water:

Cost						
Very High	Long-term	Long-term	Long-term	Medium-term	Near-term	
High	Long-term	Long-term	Medium-term	Medium-term	Near-term	
Medium	Long-term	Medium-term	Medium-term	Near-term	Near-term	
Low	Long-term	Medium-term	Near-term	Near-term	Near-term	
Very Low	Medium-term	Medium-term	Near-term	Near-term	Near-term	
	Very Low	Low	Medium	High	Very High	1

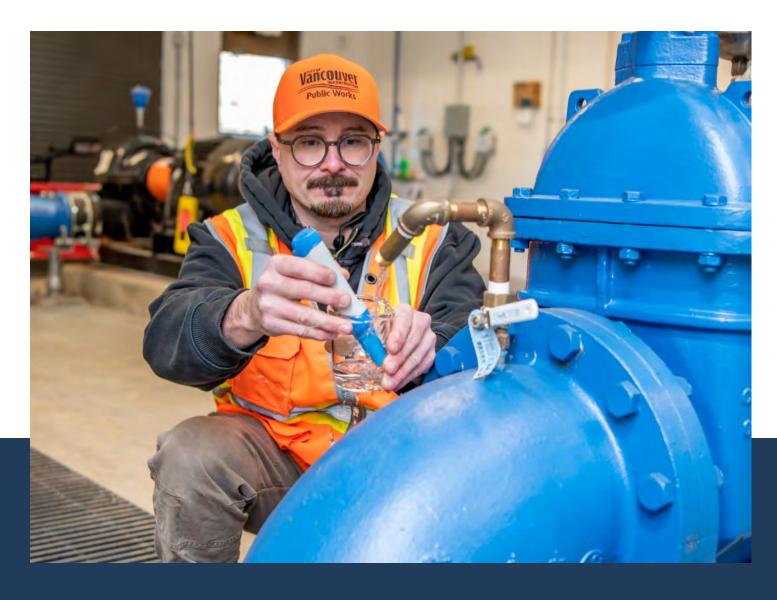

Wastewater Treatment:

Cost					
Very High	Long-term	Long-term	Long-term	Medium-term	Near-term
High	Long-term	Long-term	Medium-term	Near-term	Near-term
Medium	Long-term	Medium-term	Medium-term	Near-term	Near-term
Low	Long-term	Medium-term	Near-term	Near-term	Near-term
Very Low	Medium-term	Medium-term	Near-term	Near-term	Near-term
	Very Low	Low	Medium	High	Very High

Water Utility

Water Utility Recent Financial History

WATER FUND ACTIVITY (2019-2024)

	2019	2020	2021	2022	2023	2024

Project: 112th Ave Trans Main - Burton Rd to NE 18th St (T-34 Ph 1)

Project Extent: Burton Rd.

To: NE 18th St.

PROJECT SUMMARY

Utility Type: Water

Project Type: Distribution

Project Status: Active

PROJECT

Description:

Install a 24 inch transmission main to the east from Burton Rd to NE 18th St.

Justification:

3 - Add transmission capacity, to move water from supply sources to areas with increasing demand. Transmission mains are needed to move the water from the southwest to the east. This project improves transmission capabilities from WS 1 and Ellsworth to the east.

Priority Group:

Near-term

Total Project Cost: \$3,900,000

^{*}All project timing will be dependent on coordination with other departments including streets, pavement management, wastewater, water, and surface water.

^{**}Transportation projects (TRANS-XXX) can be found in the 6-Year Transportation Improvement Plan (TIP) document

Project: Water Station 1- Replace Wells 3, 4 and 5

Project Extent:

VICINITY MAP Creek Felida FiveCorners Orchards Airport Island State Recreation Area

To:

PROJECT SUMMARY

Utility Type: Water

Project Type: Production

Project Status: Active

PROJECT

Description:

Rehabilitate existing WS 1 Wells 3, 4 and 5 to extend useful life. Water Station #1 is an important and prolific well field. Three existing aged wells and pump houses will be replaced to provide security for the delivery of water from this site. Water rights will not be increased.

Justification:

4 -Replace/preserve/rehabilitate existing systems: This project replaces aging wells in poor condition to increase reliability for a secure water production/source and extend asset life.

Priority Group:

Near-term

Sanitary Sewer Projects Surface Water Projects Transportation Project Water Projects Water Projects Project Area

FUNDING & SCHEDULE

Project Number: PRJ100490

Grant Funded: No

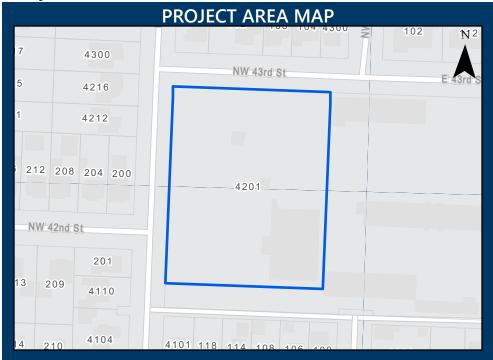

Total Project Cost: \$2,800,000

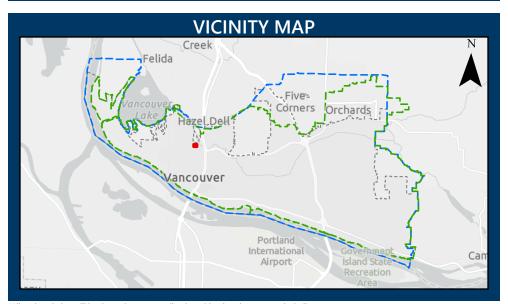

^{*}All project timing will be dependent on coordination with other departments including streets, pavement management, wastewater, water, and surface water.

Project: Water Station 3 Site Upgrades

Project Extent:

To:

PROJECT SUMMARY

Utility Type: Water

Project Type: Production

Project Status: Active

PROJECT

Description:

Construct new wells and add PFAS treatment. Replace aging tower, booster station and reservoir.

Justification:

1- Regulatory Compliance; 4 - Replace aging facilities and provide additional treatment for PFAS at the Water Station 3 site to ensure seismic resiliency, compliance with regulatory requirements, providing system reliability to allow the site to continue to supply safe, clean, drinking water.

Priority Group:

Near-term

Project: WS 15 PFAS Mitigation

Project Extent:

To:

PROJECT SUMMARY

Water

Project Type: Production

Project Status: Future

PROJECT

Description:

Utility Type:

Implement ways to mitigate PFAS in order to meet federal regulations. Also, this project will build new wells to fully utilitize our current water rights.

Justification:

1 - Regulator compliance - To satisify PFAS requirements; 3 - New systems; The new wells will increase our production capacity by allowing us to fully utilize our water rights.

Priority Group:

Near-term

Project: WS 5 Internal Tower Coating & WS 6 External Tower Coating

Project Extent:

To:

PROJECT SUMMARY Utility Type: Water Project Type: Production

Active

PROJECT

Description:

Project Status:

Rehabilitate WS 5 interior tower coating and WS 6 tower exterior coating. Rehab internal coating for our existing elevated water tower, to extend asset life by preventing corrosion. Rehab existing lining for our aging elevated steel tank, to extend asset service life.

Justification:

4 - Replace/preserve/rehabilitate: To extend asset life by preventing corrosion.

Priority Group:

Near-term

FUNDING & SCHEDULE

Project Number: PRJ100241

Grant Funded: No

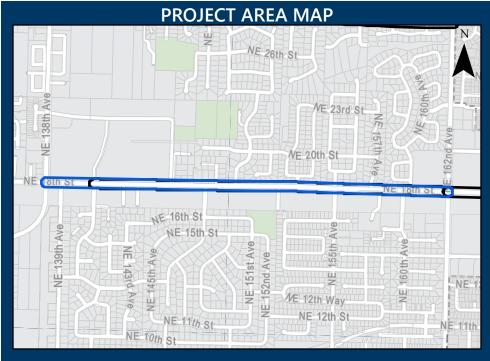

Total Project Cost: \$501,000

^{*}All project timing will be dependent on coordination with other departments including streets, pavement management, wastewater, water, and surface water.

PROJECT

Description:

Roadway Coordination project (TRANS-0531) to install 1,800 LF of watermain and abandon existing.

Justification:

4 - Replace/preserve/rehabilitate existing assets to extend service life. Waterline rehabilitation in coordination with Transportation program project.

Priority Group:

Near-term

Sanitary Sewer Projects Surface Water Projects Transportation Project Water Projects Water Projects Transportation Project Project Project Area

FUNDING & SCHEDULE

Project Number: PRJ100771

Grant Funded: No

Total Project Cost: \$170,000

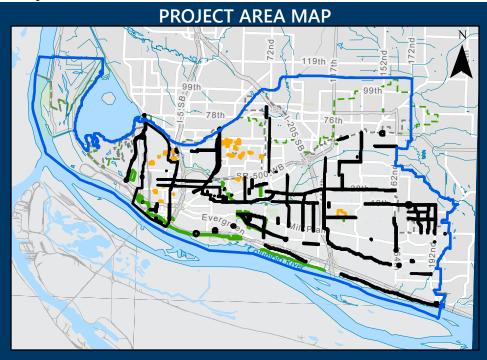

^{*}All project timing will be dependent on coordination with other departments including streets, pavement management, wastewater, water, and surface water.

^{**}Transportation projects (TRANS-XXX) can be found in the 6-Year Transportation Improvement Plan (TIP) document

Project: PFAS Study

Project Extent:

VICINITY MAP Creek Felida FiveCorners Orchards International Airport Island State Recreation Area

To:

PROJECT SUMMARY

Utility Type: Water

Project Type: Production

Project Status: Active

PROJECT

Description:

Our drinking water system is required to study system wide needs to meet new removal requirements for Per- and polyfluoroalkyl substances (PFAS).

Justification:

1 - Regulatory compliance: New treatment regulations require us to identify new treatment required across the system. First phase is system study in 2021/22, second phase will implement treatment process equipment throughout our water system.

Priority Group:

Citywide and subarea projects were not scored

Sanitary Sewer Projects Surface Water Projects Transportation Project Water Projects Water Projects Project Area SCIP Projects Sewer Utility Service Boundary City Limits

FUNDING & SCHEDULE

^{**}Although expenses and revenues fluctuate from year to year, staff manages the fund balances to ensure it meets City policies.

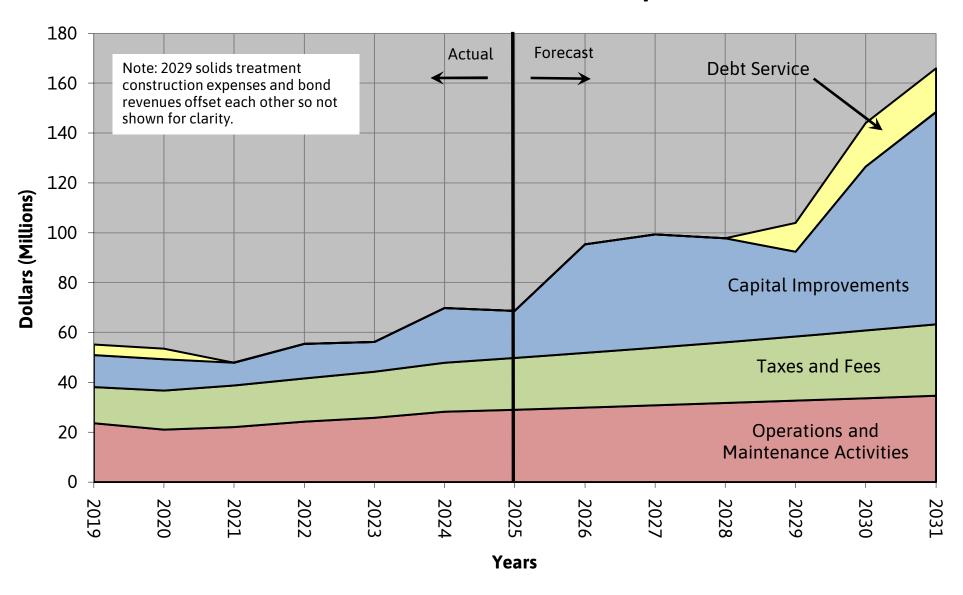

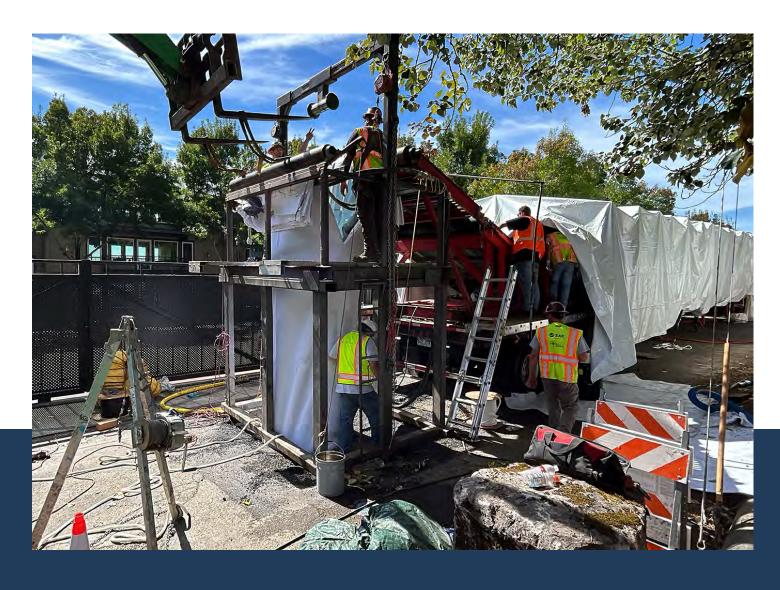

2019-2031 Wastewater Revenues

2019-2031 Wastewater Expenses

Wastewater Utility Project List

Wastewater Utility CIP Changes

This page provides an overview of the changes from the previous 6-year project list (2025-2030) to this year's 6-year project list (2026-2031). The changes are segmented by: projects added, projects removed and other.

Projects Added	CIP Number	Comments
Collection:		
Grand Loop Infrastructure Improvements	SS-1369	New
Manhole/Wye Rehabilitation	SS-A1-138	Funding allows for program to restart
Southside interceptor Rehab Ph 4B	SS-1370	New
2026 General Sewer Plan Update	SS-1371	New
Pinebrook Pump Station Upgrade	SS-1372	New
Burnt Bridge Creek Interceptor Rehab	SS-1373	New
Study & Design		
Burnt Bridge Creek Interceptor Ph 1	SS-1306	Moved from 20-yr to 6-yr list
Burnt Bridge Creek Interceptor Ph 2	SS-1307	Moved from 20-yr to 6-yr list
Burnt Bridge Creek Interceptor Ph 3	SS-1308	Moved from 20-yr to 6-yr list
Burnt Bridge Creek Interceptor Ph 4	SS-1309	Moved from 20-yr to 6-yr list
Sewer Connection Incentive Program	SS-1395	New
Camelot Court	SCIP-0075	New
Treatment:		
Marine Park Pump #3	SS-1374	New
Marine Park Secondary Clarifier	SS-1375	New
Lining/Rehab (4)		
Marine Park Washdown PS Rehab	SS-1376	New
Marine Park Medium Voltage Electrical -	SS-1377	New
transformers, substations		
Westside Diffuser Grids	SS-1378	New
Westside Bypass Pump	SS-1379	New
Screenings/Improvements		
Marine Park Primary Underflow	SS-1380	New
VFDs/Process Improvements		
Lagoon Frito Lay PS and Force Main	SS-1381	New
Lagoon Blower #2	SS-1382	New
Andresen Medium Voltage Electrical	SS-1383	New
Orchards Medium Voltage Electrical	SS-1384	New
SCADA Overhaul	SS-1385	New

Projects Removed	CIP Number	Comments
Collection:		
SE 1st St SE 172nd Ave. to SE 192nd Ave	SS-0015	Completed
Design		
NE 137th Avenue - NE 49th St. to NE Fourth	SS-0020	Completed
Plain Blvd		
18th Street Trunk Rehabilitation	SS-1285	Completed
East Interceptor Rehab Ph 1 - 2A	SS-0163	Completed
GMA Pump Station Upgrades	SS-0172	Completed
Pearson Pump Station Upgrade	SS-1050	Completed

Jefferson-Kauffman Sewer Improvements	SS-0189	Completed
Springbrook Pump Station Upgrades	SS-1286	Completed
NE 122 nd Ave	SCIP-0105	Completed
West Vancouver	SCIP-W-238	Combined with SS-1395 Sewer
		Connection Incentive Program
Central Vancouver	SCIP-CN-	Combined with SS-1395 Sewer
	239, SCIP-	Connection Incentive Program
	CS-243	
East Vancouver	SCIP-EN-	Combined with SS-1395 Sewer
	240, SCIP-	Connection Incentive Program
	EC-242,	
	SCIP-ES-241	
Treatment:		
Marine Park UV Upgrade	SS-0157	Completed
Marine Park – Refurbish Odor Control	SS-0085	Combined with project – Marine Park
System		Odor Control Fiberglass
		Ductwork/Tower (2), this project is on
		the 20-yr list, anticipated 2038
Westside Influent Pump Gallery Rehab	SS-1067	Completed
Westside Sodium Hypochlorite Delivery	SS-0175	Completed
Westside Polymer Refurbish	SS-0159	Completed
Westside WWTF Buildings Coatings Project	SS-0192	Combined with SS-0034 Industrial &
		Buildings Coating Projects
Westside Solids Planning	SS-0167	Completed
Westside Schwing Pump Replacement	SS-1315	Completed
Burnt Bridge Creek Pump Station Upgrade	SS-0028	Determined to be not needed
SEH Industrial Pump Station	SS-0195	Completed

Other Changes	CIP Number	Comments
Collection:		
Main Street – 5 th to 15 th Transpo	SS-0005	Changed name to reflect project more accurately
West Fourth Plain	SS-1317	Moved to 20-yr list due to budget constraints, anticipated 2032
Treatment:		
Marine Park Solids Conveyance	SS-0178	Changed name to reflect project more accurately and update PRJ number
Industrial & Buildings Coating Projects	SS-0034	Changed name to reflect project more accurately
Westside and Marine Park Chemical Tanks Refurbish	SS-0074	Changed name to reflect project more accurately

Note: "Completed" indicates already completed as of the date of this document or anticipated completion prior to January 1, 2026.

6-Year Wastewater Capital Improvement Program (2026-2031)

Note: All costs are in 2025 dollars, updated August 2025 * Project timing is dependent upon the timing of the overriding project (e.g. TIP projects).

	**2025 amounts are projected cost, not included in 6-year total.

Project: Main Street - 5th St. to 15th St. Transpo

Project Extent: W 5th St.

To: W 15th St.

PROJECT SUMMARY

Utility Type: Wastewater

Project Type: Collection - Horizontal

Project Status: Active

PROJECT

Description:

Roadway Coordination project -Replace 1,900 ft of original (1890) clay mains in Main St. Our oldest mains will be replaced in coordination with planned Transportation Improvement Program improvements in Main Street. Sewer line construction will be triggered if the TIP Project moves ahead. Sewer CIP design will be included in the Transportation CIP project plan set.

Justification:

4 - Replace/preserve/rehabilitate systems; to replace and rehabilitate our oldest mains, (Installed 1890's in Vancouver's first sanitary sewer project), to extend the reliable asset service life.

Priority Group:

Near-term

Sanitary Sewer Projects Surface Water Projects Transportation Project Water Projects Water Projects Project Area

FUNDING & SCHEDULE

Project Number: PRJ100790

Grant Funded: No

Total Project Cost: \$1,606,000

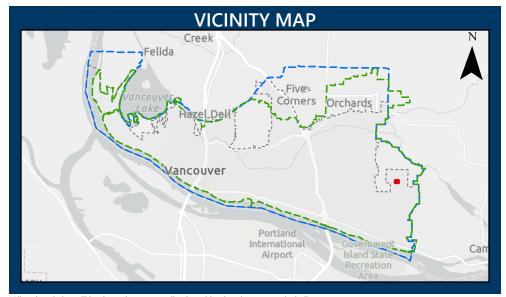

^{*}All project timing will be dependent on coordination with other departments including streets, pavement management, wastewater, water, and surface water.

Project: Section 30 South Pump Station

Project Extent:

To:

PROJECT SUMMARY

Utility Type: Wastewater

Project Type: Collection - Vertical

Project Status: Future

PROJECT

Description:

Developer Pump Station within Section 30 South being constructed by the City following the terms of a Developer Agreement.

Justification:

3 - New systems - To install new sewer mains in the Transportation's Section 30 (SE 1st St) Arterial Expansion Project as identified in the Transportation Improvement Program. Timing is dependent on the Transportation project. Project budget is based on an estimate of 17,000 linear feet of 12-inch main.

Priority Group:

Medium-term

Sanitary Sewer Projects Surface Water Projects Transportation Project Water Projects City Limits LEGEND SCIP Projects Sewer Utility Service Boundary City Limits

FUNDING & SCHEDULE

Project Number: PRJ101013

Grant Funded: No

Total Project Cost: \$2,500,000

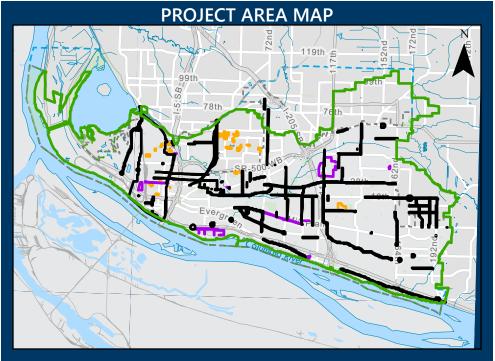

^{*}All project timing will be dependent on coordination with other departments including streets, pavement management, wastewater, water, and surface water.

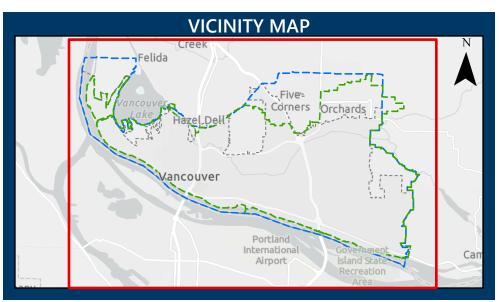

^{**}Transportation projects (TRANS-XXX) can be found in the 6-Year Transportation Improvement Plan (TIP) document

Project: Capital Preservation and Compliance (Treatment)

Project Extent:

To:

PROJECT SUMMARY

Utility Type: Wastewater

Project Type: Treatment

Project Status: Active

PROJECT

Description:

Multi-year program to fund major repairs and rehabilitation of existing infrastructure and equipment at wastewater treatment facilities. Budget of \$3,000,000 in 2028 and \$2,000,000 in 2031.

Justification:

4 - Replace/preserve/ rehabilitate systems. This program funds extraordinary repair and rehabilitation projects to extend useful life of equipment at the Westside and Marine Park Wastewater Treatment Facilities. The program also funds emergency repairs and equipment for new compliance initiatives in permits and regulations.

Priority Group:

Citywide and subarea projects were not scored

Project: Westside Odor Control Improvements

Project Extent:

Vancouver Corners Orchards Orchards International Airport Island State Recreation Area

To:

PROJECT SUMMARY

Utility Type: Wastewater

Project Type: Treatment

Project Status: Active

PROJECT

Description:

Install additional odor control system to control and treat odorous air from wastewater and solids process units.

Justification:

- 1 Regulatory compliance. Additional odor control system would capture and control fugitive odorous gases, which is regulated by Southwest Clean Air Agency regulations.
- 2 Improved safety. Increased capture of odorous gases improves air quality for environmental protection and lessens nuisance odors at nearby locations.
- 3 New systems. The additional odor control system will be a new asset at Westside Wastewater Treatment Facility.

Project: Marine Park Solids Conveyance

Project Extent:

VICINITY MAP Creek Felida Felida Corners Orchards International Airport Island State Recreation Area

To:

PROJECT SUMMARY

Utility Type: Wastewater

Project Type: Treatment

Project Status: Active

PROJECT

Description:

New solids holding tank and 10-inch-diameter forcemain to convey wastewater solids streams from Marine Park WWTF to the Westside WWTF solids system.

Justification:

3 - New system. Wastewater solids conveyance buried forcemain line will re-route wastewater solids streams away from the sewer collection system and directly to Westside's solids processing facility; 1 - Regulatory compliance. The project will reduce solids loading to Westside headworks and thereby provide for increased capacity and system growth; 5 - Lower operating cost; The re-routing of wastewater solids will provide for more efficient wastewater treatment processes at Westside WWTF.

Priority Group:

Surface Water Project List

Surface Water Utility CIP Changes

This page provides an overview of the changes from the previous 6-year project list (2025-2030) to this year's 6-year project list (2026-2031). The changes are segmented by: projects added, projects removed and other.

Projects Added	CIP Number	Comments
Coordination Projects (SCIP/Trans)	SW-A1-21	Moved from 20-yr list to 6-yr list
Water Quality Vaults Assessment &	SW-1387	New
Water Quality Evaluation		
Ambient Water Quality Monitoring	SW-1388	New

Projects Removed	CIP Number	Comments
15th Ave East Greenway Restoration	SW-A1-34	Determined not to be required in current
		NPDES Permit and budget constraints
Hearthwood Infiltration Expansion	SW-0050	Site stable, removed due to budget
		constraints
Fruit Valley Neighborhood Storm	SW-0058	Study completed, determined infeasible,
Retrofit - Grant		no further action
North Image & NE 129th Ave	SW-0057	Site stable, removed due to budget
		constraints
Treatment Vault Retrofit at SE 164th	SW-1330	Site stable, removed due to budget
Ave, Shari's Restaurant		constraints
Climate Resiliency for Conveyance	SW-1337	Removed due to budget constraints
Fairway Drive Infiltration Expansion	SW-1342	Site stable, removed due to budget
		constraints
Old City Cemetery and SE Central Park	SW-1336	Site stable, removed due to budget
Neighborhood Improvements		constraints
NE 112 th Ave, NE 18th St to NE 26th St	SW-1328	Focus shifted to BBC basin as determined
		in SMAP
NE Cranbrook Dr, NE Burton Rd to NE	SW-1329	Focus shifted to BBC basin as determined
21 st St		in SMAP
NE 98 th Ave by Marrion Elementary	SW-1333	Focus shifted to BBC basin as determined
School		in SMAP
Neighborhood Infiltration	SW-1311	Removed due to budget constraints
Retrofit/Rehabilitation		

Other Changes	CIP Number	Comments
BBC Property Acquisition – Phase 3	SW-1332	Changed name to reflect project more accurately
Failed Storm Main Lining & Repair	SW-1339	Changed name to reflect project more accurately
Arterial Safety/Treatment Projects	SW-A1-24	Moved to 20-yr list due to budget constraints, anticipated 2032
Watershed Planning	SW-A1-39	Moved to 20-yr list due to budget constraints, anticipated 2034

Note: "Completed" indicates already completed as of the date of this document or anticipated completion prior to January 1, 2026.

6-Year Surface Water Captial Improvement Program (2026-2031)

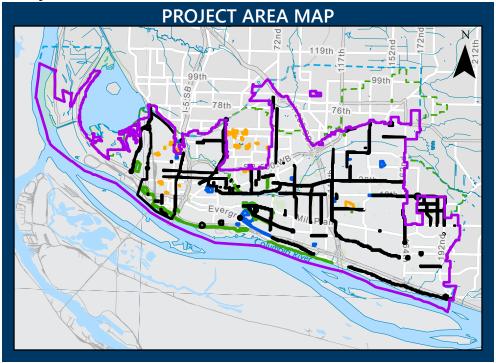

Note: All costs are in 2025 dollars, updated August 2025 *Project timing is dependent upon the timing of the overriding project (e.g. TIP projects). **2025 amounts are projected cost, not included in 6-year total.

			1						ZUZS amount	s are projected	cost, not includ	ed in 6-year total.

Project: Columbia Way to Columbia River Retrofits

Project Extent:

To:

PROJECT SUMMARY

Utility Type: Surface Water

Project Type: Regulatory Compliance

Project Status: Active

PROJECT

Description:

This project improves stormwater quality from City-owned roadways within portions of the Columbia Business Center, a 200-acre commercial/industrial park that lies within the Columbia Slope watershed, by replacing existing standard catch basins with new filter cartridge catch basins.

Justification:

1 - Compliance with WDOE regulations and provides treatment to meet citywide NPDES treatment retrofit requirements.

Priority Group:

Near-term

Project: Lincoln Outfall Basin Retrofit - W Fourth Plain

Project Extent:

To:

PROJECT SUMMARY

Utility Type: Surface Water

Project Type: Substandard System

Project Status: Future

PROJECT

Description:

Water quality retrofits to improve surface water facilities in the W Fourth Plain Blvd corridor between Broadway and railroad. New stormwater system to eliminate a cross connection to sanitary sewer. Improvements will include basin delineations and stormwater modeling and constructing water quality treatment of stormwater and new piping to connect to an existing stormwater system.

Justification:

1 - Regulatory compliance: Provide treatment to meet citywide NPDES treatment retrofit requirements.; 3 - New systems; Stormwater from a portion of this basin connects directly to sanitary sewer. Constructing a new stormwater system will reduce the flows to the sanitary system.

Priority Group:

Near-term

Ongoing fund for unanticipated projects, both within Public Works and other departments. Projects may include Roadway Coordination, Traffic Hazard/Property Threatening High Water, Slope Stability/Erosion Prevention, Tree Plantings, NPDES Permitting, and Surface Water Monitoring for Quality and Quantity. Budget of \$200,000 in 2027 and 2029. Budget of \$500,000 in 2028.

Justification:

1 - Regulatory compliance; 2 - Improve safety; 4 - Replace/preserve/rehabilitate systems

Priority Group:

Citywide and subarea projects were not scored

Sanitary Sewer Projects Surface Water Projects Transportation Project Water Projects Water Projects Transportation Project Project Project Area

FUNDING & SCHEDULE

Project Number: PRJ100221

Grant Funded: No

Total Project Cost: \$

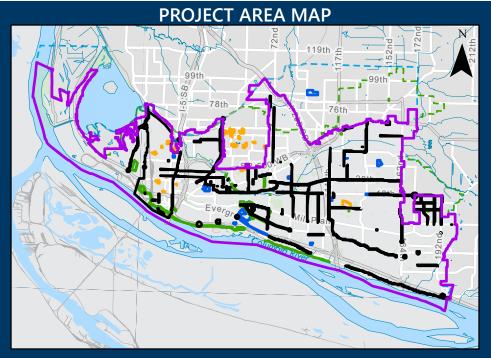

^{*}All project timing will be dependent on coordination with other departments including streets, pavement management, wastewater, water, and surface water.

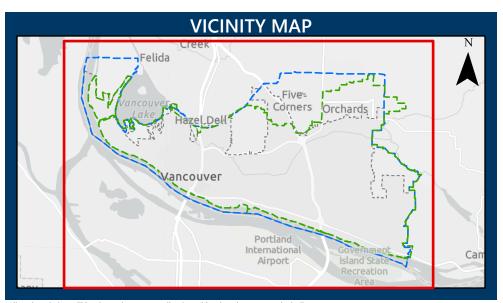

^{**}Transportation projects (TRANS-XXX) can be found in the 6-Year Transportation Improvement Plan (TIP) document

Project: Coordination Projects (SCIP/Trans)

PROJECT SUMMARY

Utility Type: Surface Water

Project Type: Coordination Projects

Project Status: Active

PROJECT

Description:

Surface Water Coordination Projects constructed as part of the City Sewer Septic Connection Incentive Program (SCIP) or with City Transportation Pavement Management projects. Budget of \$250,000 in 2029 and \$300,000 in 2031.

Justification:

4 – Replace/preserve/rehabilitate: Upgrade and standardize quantity and quality surface water treatment facilities within the project limits of the associated SCIP/Transportation project.

Priority Group:

Citywide and subarea projects were not scored

Sanitary Sewer Projects Surface Water Projects Transportation Project Water Projects Water Projects Transportation Project Project Project Area

FUNDING & SCHEDULE

Project Number: TBD

Grant Funded: No

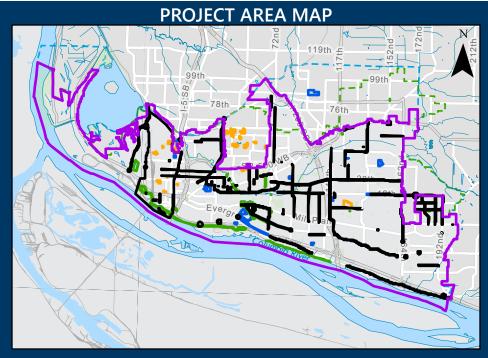

Total Project Cost: \$

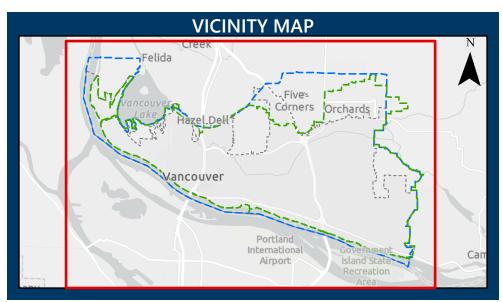

^{*}All project timing will be dependent on coordination with other departments including streets, pavement management, wastewater, water, and surface water.

Project: Facility Retrofit Program

Project Extent:

To:

PROJECT SUMMARY

Utility Type: Surface Water

Project Type: Facility Retrofits

Project Status: Active

PROJECT

Description:

This Surface Water management program identifies substandard facilities, and retrofits swales to meet current water quality standards. Budget of \$250,000 in 2027 and \$500,000 in 2029.

Justification:

4 – Replace/preserve/rehabilitate; 5 – Lower operating costs: This program will retrofit swales providing new facilities that meet the city's current standards for water quality and maintenance.

Priority Group:

Citywide and subarea projects were not scored

Sanitary Sewer Projects Surface Water Projects Transportation Project Water Projects Water Projects Transportation Project Project Project Area

FUNDING & SCHEDULE

Project Number: TBD

Grant Funded: No

Total Project Cost: \$

^{*}All project timing will be dependent on coordination with other departments including streets, pavement management, wastewater, water, and surface water.

^{**}Transportation projects (TRANS-XXX) can be found in the 6-Year Transportation Improvement Plan (TIP) document

Note: All costs are in 2025 dollars, updated August 2025 'Project timing is dependent upon the timing of the overriding project (e.g. TIP projects).

Glossary

Glossary

FREQUENTLY USED TERMS AND ACRONYMS

BBC

Burnt Bridge Creek

CIP

Six-Year Capital Improvement Program

City

City of Vancouver

CMOM

Capacity, Management, Operations, and Maintenance. It is a flexible, dynamic framework for municipalities to identify and incorporate widely accepted wastewater industry practices to: better manage, incorporate, and maintain collection systems; investigate capacity constrained areas of the collection system; and respond to sanitary overflow (SSO) events.

COV

City of Vancouver

DI

Ductile Iron material

DOH

Department of Health. DOH works with agencies to project and improve the health of all people in Washington state.

EPA

Environmental Protection Agency. The EPA protects people and the environment from significant health risks, sponsors and conducts research, and develops and enforces environmental regulations.

ER&R

Equipment Rental and Revolving fund. ER&R funds are established to provide equipment rental services within a local government. ER&R funds are internal service funds and operates on a cost reimbursement basis (without generating a profit).

Framework

Water Resiliency Framework. The Framework recognizes the intrinsic connection of our water and relation to community health, economy, reliable infrastructure, and service.

GMA

Growth Management Act. GMA requires all cities and counties to adopt regulations protecting critical areas, or environmentally sensitive natural resources that are designated for protection and management.

LF

Linear Feet

MV

Medium-voltage

NPDES

National Pollution Discharge Elimination System. The NPDES permit program addresses water pollution by regulating point sources that discharge pollutants to waters of the state.

PFAS

Per- and Polyfluoroalkyl Substances. PFAS are a group of over 5,000 manmade chemicals that are found in many common consumer and industrial products like nonstick cookware, food packaging, stain resistant fabrics, firefighting foam and more. Most PFAS don't break down, which is why they are also called "forever chemicals".

PS

Pump Station

Right-of-Way/ROW

Right-of-way is property held by the City for existing or future public roads or other public improvements.

SCADA

Supervisory Control and Data Acquisition

SCIP

Sewer Connection Incentive Program. The SCIP provides an easy and affordable solution to septic owners within the service area to connect to the public wastewater system.

SDC

System Development Charges. SDC means that connection fee charged so that the property upon which it is imposed will pay its equitable share of the costs of the waterwastewater system facilities which are system-wide in nature and are not site specific needs, including such property's equitable share of the amount required to upgrade system to meet the demands imposed by the development.

SEH

Shin-Etsu Handotai America

SEPA

State Environmental Policy Act. SEPA is a state law requiring agencies to consider the environmental consequences of their decisions. (WAC 197-11-790).

SFAP

Stormwater Financial Assistance Program. The Ecology SFAP grant is designed to fund stormwater projects and activities that have proven effective at reducing impacts from existing infrastructure and development and enhance existing stormwater programs.

SRL

State Revolving Loan. SRL funds are loan programs that are capitalized by federal grants, state appropriations and dedicated revenues.

SSO

Sanitary Sewer Overflow. SSOs can contaminate our waters, causing serious water quality problems, and back-up into homes, causing property damage and threatening public health. Point source discharges to waters of the state from municipal sanitary sewer systems are prohibited unless authorized by a NPDES permit.

TBD

To Be Determined

TIP

Six-Year Transportation Improvement Program

UIC

Underground Injection Control. UIC wells or injection wells are structures built to allow fluids to flow in the ground under the force of gravity (e.g. drywell). The UIC program (Chapter 173-218 WAC) protects groundwater by regulating the discharge of fluid from UIC injections wells.

Utilities

Refers to water, wastewater, and surface water utilities.

VFD

VFD stands for Variable Frequency Drive. A VFD controls a pump's speed by varying the frequency of the electrical power supplied to the motor. The motor's load directly relates to the work the pump is performing.

WDOE/Ecology

Washington Department of Ecology is Washington's environmental protection agency; to protect, preserve, and enhance Washington's land, air, and water for current and future generations.

WS

Water Station.

WSDOT

Washington State Department of Transportation. WSDOT is a department of the State of Washington responsible for transportation-related planning, management, and coordination.

WWTF

Wastewater Treatment Facility.
